

Data Manipulation Language

select

retrieves records
(read-only)

```
select * from TABLE_NAME where [CONDITION]
```

use * wildcard to select all data
or specify column names to fetch

insert

Creates a new record

```
insert into TABLE_NAME (COLUMN_1,... COLUMN_N) values (VALUE_1,... VALUE_N)
```

update

update an existing record

```
update TABLE_NAME set COLUMN = VALUE where [CONDITION]
```

delete

remove record(s)

```
delete from TABLE_NAME where [CONDITION]
```
